

EASTSIDE PROJECTS GO GREEN!

Eastside Projects have gone green. No, they haven't given up their trademark day glo colour scheme, they've really gone green, environmentally green! Looking to become the most environmentally aware gallery in the West Midlands, EP have really shown off their green credentials over the last year. Not only did they plant trees in the gallery, they also installed a giant plastered poly tunnel! Although our BAZ reporter didn't see any tomatoes been grown when he visited the space, word has it that by next year Eastside Projects will be a tomato heaven. BAZ suggest it might be an idea to include some windows for light though.

THE IKON SKIP REPORT

BEAT THE CREDIT CRUNCH WITH THE IKON SKIP REPORT!

Exclusive highlights of what has been thrown out in February: three 4X8 sheets of Plywood, 2 wooden ladders, 7 panes of brand new glass and a Ferrari.
